# Our Services

## Hydraulic Sales and Services

- Hydraulic hose services and repairs to pumps, motors and all other hydraulic equipment
- Remote site setup - On-site workshops
- Products repaired and tested to OEM specifications, test certifications supplied for all repairs
- Supply of new replacement OEM pumps, motors and valves together with reconditioned components
- Upgrades and modifications on existing equipment in conjunction with a change management process

## Maintenance and Services

- Complete planned maintenance according to schedules
- Optimise Life Cycle Costing (LCC) in conjunction with regular inspection and monitoring components for accelerated wear
- Complete scheduled lubrication using kidney loop systems
- Equipment solutions for short, medium and long-term stacking
- Labour hire for project specific shutdowns
- Provide dedicated support for overall project fabrication requirements

We provide a broad range of maintenance services and specialist mining products across Africa, ensuring high asset availability and reliability to give you confidence your project won't be impacted by unplanned downtime.

## Specialist Mining Supplies

- Exclusive distributor access across Africa
- Range of high-quality products from leading brands including Mudex drilling fluids, IFES fire suppression systems, Trime mobile lighting, Pirtek hydraulics hoses and fittings, Vision X LED lighting solutions, Kincome tools and equipment and ITR earth moving components.

## Rebuilds and Fabrication

- Clean and prepare components for initial assessment and quotation
- Optimise asset Life Cycle Costing (LCC)
- Undertake thorough component testing using the latest diagnostic technologies
- Strip assets completely, inspect all parts and prepare quotation
- Reassemble assets, replacing or reconditioning all components as required
- Complete final testing to ensure rebuilt asset meets the highest standards and OEM requirements

## Fleet and Equipment Rentals

- Project-specific asset rentals
- Management of transportation logistics
- Reduce capital commitment of purchase and ongoing maintenance and repair expenditure
- Provide flexible fleet to meet market fluctuations
- Improve project profitability via reduced depreciation costs
